(a) Foreign export data are compiled on the Harmonised Commodity Description Coding System (HCDCS), not the Standard International Trade Classification (Revision 3). (b) Excluding non-merchandise trade; including re-exports. (c) These are selected major items only and therefore do not add to the totals shown. From April 1992, exports are compiled on the basis of goods shipped in any calendar month rather than the documentation of goods shipped in that or earlier months. Data have been revised back to July 1991 on the new compilation basis. (d) All meats and meat products, fresh, frozen or canned. (e) Raw or refined. (f) Greasy or scoured.

(a) Imports relate to the State in which the import entry was lodged with the Australian Customs Service. Foreign import data are compiled on the Harmonised Commodity Description Coding System (HCDCS), not the Standard International Trade Classification (Revision 3). (b) Excluding non-merchandise trade. (c) These are selected major groups only and therefore do not add to the totals shown. Imports are recorded statistically in the calendar month in which the import entries are both finalised by the Australian Customs Service and passed to the ABS for further processing. (d) Manufactured goods not included in the other selected commodity groups listed in this table.

(a) From September quarter 1991 and September quarter 1992, respectively, data are not comparable with those for previous periods as some caravan parks previously classified as short-term were reclassified as long-term. (b) Including both on-site van sites and other powered sites. (c) From September quarter 1992, caravan park sites, etc. permanently reserved but only casually occupied by their tenants have been recorded continuously as site nights occupied irrespective of whether the tenants of individual sites were in residence on any particular night. Occupancy measures from September quarter 1992 are not therefore comparable with those from previous quarters.

Now, ABS Regional Data at your finger-tips with IRDB96

Decision makers, either located in regional Australia or making decisions in respect of regional Australia, have commented to the Australian Bureau of Statistics (ABS) about the real difficulties they experience in obtaining consistent regional level data to help them in their work.

Now you can obtain the *new, enhanced version* of the **Integrated Regional Database - IRDB96**.

The ABS recognises the need for regions experiencing change to have access to quality information on a wide range of social, cultural and economic issues. The *Integrated Regional Database* represents a further effort to raise awareness of existing data sources relating to regional Australia and to provide you with a more effective way of making informed decisions.

Information is presented by broad subject. Each subject includes information on the data source, their frequency, the data items available, the geographic coverage and the availability of past data. The software allows for graph and table production and mapping software is also an option included.

If you would like to know more about the *Integrated Regional Database* then simply complete the order form below and mail or fax it back to us today.
